

# Explore California

In [mission.html](#), add external **script.js** to:

- ▣ Change the text from “Mission” to “Our Mission”.
- ▣ `console.log` the first paragraph “We are passionate ...”
- ▣ Change the Quick Nav at the bottom left to read “Our Tours”, “Our Mission”, “Our Contact”.
- ▣ Change the contact number on the bottom right to “(65)98765432”.
- ▣ Create events to allow the updates after user clicks on the elements. E.g. **Mission** changed to **Our Mission** after clicking

# More challenges

- Ask the user input contact number. Change the **contact number** on bottom right from the user input.
  - Hint: save user input into a variable, set innerHTML to variable.
- Change the color of “Who we are” to Red, font size to 3em
  - Hint: element.style.xxx where xxx is CSS property
- Create and invoke a function called **RandomColor** that does the following:-
  - Randomly change the color of “Mission” (either Red, Blue or Green) every time the page loads.
  - Hint: randomly choose from 1-3, use if-else or switch-case
- Challenge: Enhance the function to **randomize colour of any element** as input parameter.
